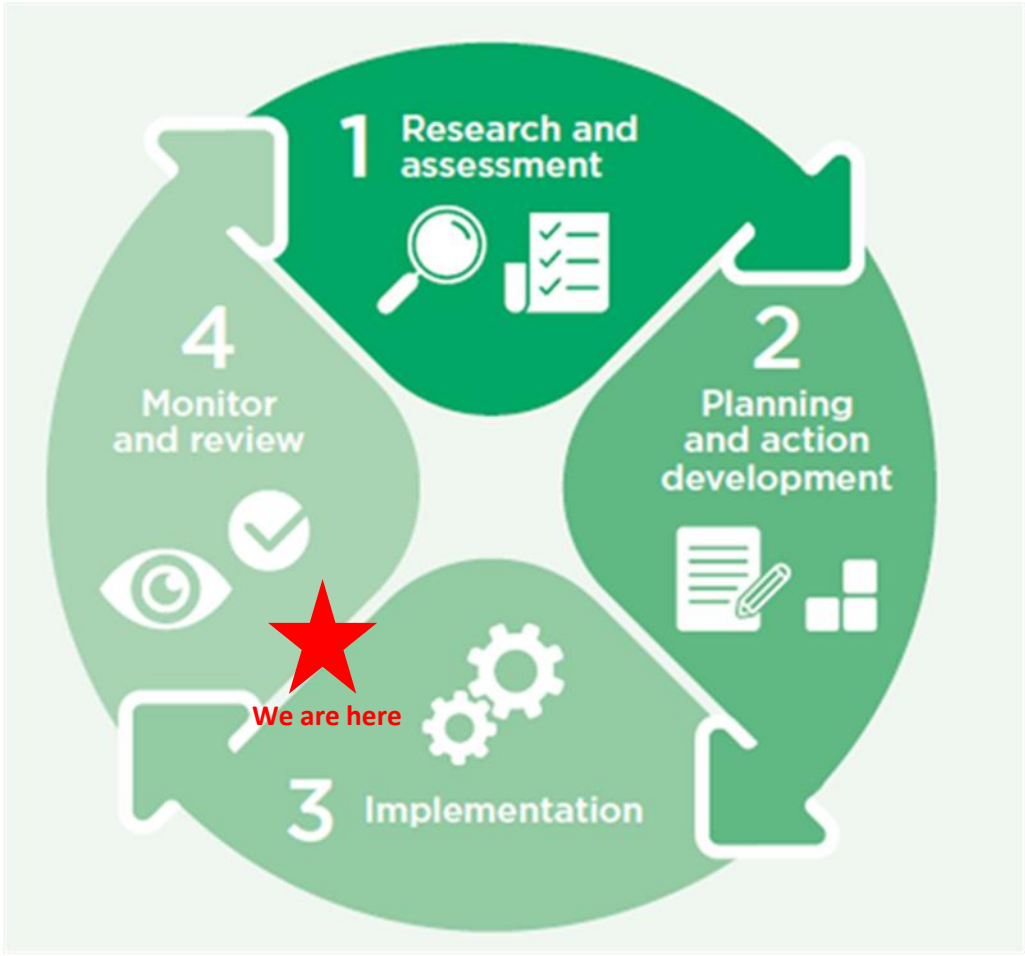
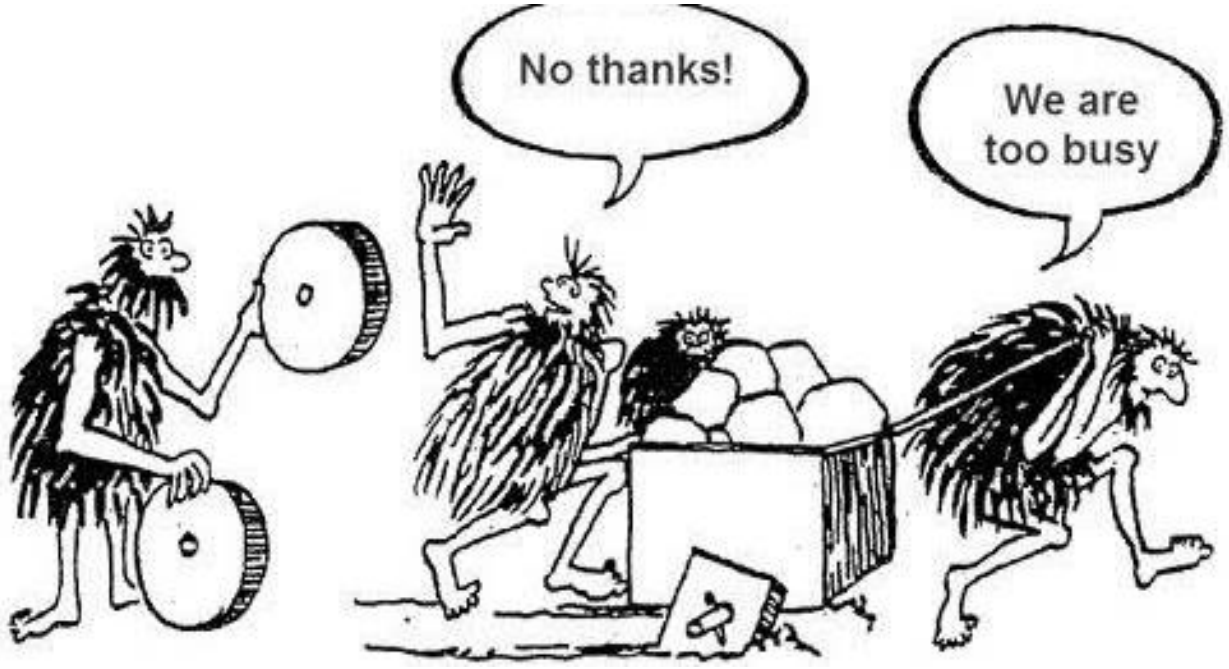
Climate Change Adaptation – A continuous process



We need to understand adaptation outputs and outcomes



- Understanding about how effective our adaptation actions are (Are we doing the right things?)
- Keeping track of the efficiency of our chosen actions (Are we doing things right?)

Climate Change Adaptation Strategy 2017
Implementation, monitoring and evaluation framework

Track implementation

Annual

- Track actions
- Track outputs

Evaluate progress and learning

2 – 5 years

- Learning – Evaluate organisational change and capability
- Engagement & alignment
- Assess output implementation

Monitor outcomes and external context

As required

- Track progress
- Assess outcomes
- Understand challenges

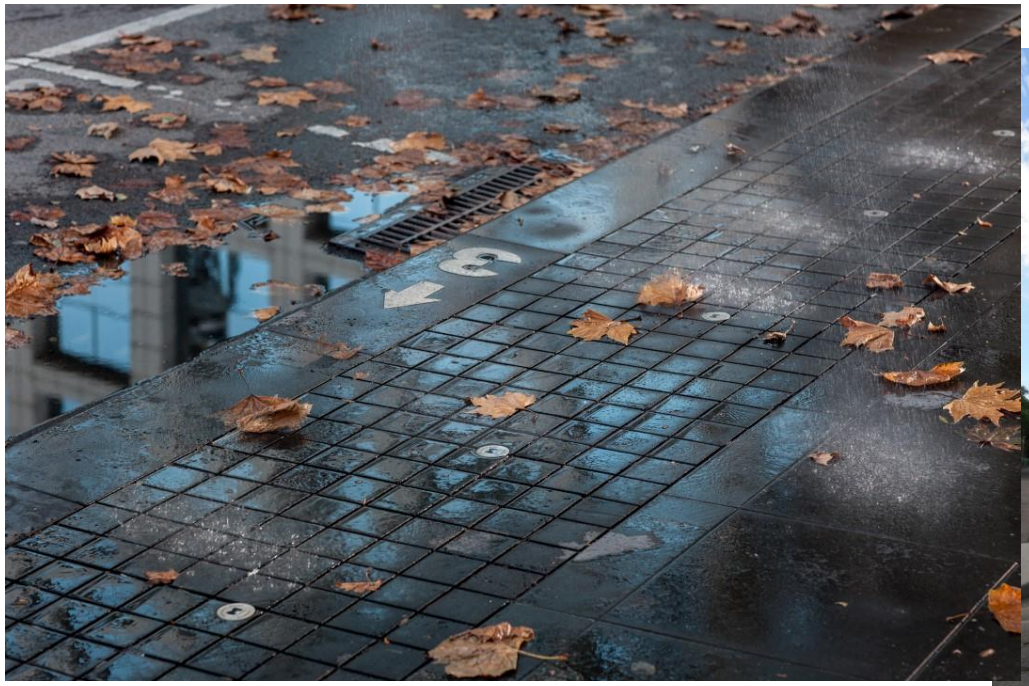
Quantitative

Qualitative

Measures in projects - examples

ACTION
Building vulnerability assessments to identify actions that can improve building performance in extreme weather

Measures in projects - examples

ACTION


Implementing nature-based solutions - Install permeable pavement within roads and footpaths in the Elizabeth Street Catchment
